MARCH 13**

Call (815) 727-4811
to the Will County
Farm Bureau

Will County Farm Bureau farmers and community partners are committed to educating farmers and lay people alike regarding issues and new developments in the agriculture industry. Nutrient Stewardship and sound farming economics are critical to a thriving farming industry. Join us to learn more about soil health, research, and innovations in the field.

SPEAKER BIO

Torey Colburn is the Midwest Conservation Agronomist with American Farmland Trust and an active member of the Illinois Sustainable Ag Partnership (ISAP). He works directly with producers and ag advisers to advance soil health, improve nutrient efficiency, and support the adoption of practical, in-field conservation practices.

A Certified Crop Adviser with over 15 years of agronomic experience, Torey provides field-level technical agronomic support, leads on-farm demonstrations, and helps producers and advisers integrate profitable and sustainable solutions into their management systems.
