Join the Clinton County Farm Bureau for a Southern Illinois Regenerative Bus Tour, hosted in partnership with the Southern Illinois Farmers for Soil Health. This interactive tour will visit local farms implementing innovative regenerative practices that improve soil health and nutrient stewardship.

Stops will include our local Cover Crop and Forage Plot, along with conversations with farmers about cover crop timing, termination, and management strategies. Participants will also see in-field demonstrations

including soil penetrometer readings, water infiltration testing, and Brix testing to evaluate soil health and plant performance.

Come learn from local farmers, see real-world practices in action, and gain practical insights for improving soil health on your farm.

TOUR HIGHLIGHTS

- Visits to local farms implementing regenerative practices
- Stop at our Cover Crop & Forage Research Plot
- Discussions on cover crop timing, termination, and management
- In-field demonstrations including:
 - Soil penetrometer testing
 - Water infiltration testing
 - Brix testing for plant health
- Learn directly from farmers using these practices in real-world conditions

THIS TOUR OFFERS A GREAT OPPORTUNITY FOR FARMERS, LANDOWNERS, AND CONSERVATION PARTNERS TO SEE SOIL HEALTH PRACTICES IN ACTION AND LEARN PRACTICAL APPROACHES TO IMPROVING NUTRIENT STEWARDSHIP.
