

ILLINOIS AGRICULTURE MONARCH ACTIVITY REPORT 2014-2019

In May 2020, Illinois Farm Bureau submitted data to the Illinois Monarch Project for the United States Fish and Wildlife Service's (USFWS) Monarch Conservation Database. The information provided outlines the collective efforts of multiple stakeholders in the agriculture sector and includes a wide variety of efforts toward education and conservation of the monarch butterfly in Illinois.

USDA CRP & CP-42 ACRES (estimates)

OVER
850,000
Conservation
Reserve Program
acres

OVER
100,000
Pollinator Habitat
Program (CP-42)
acres

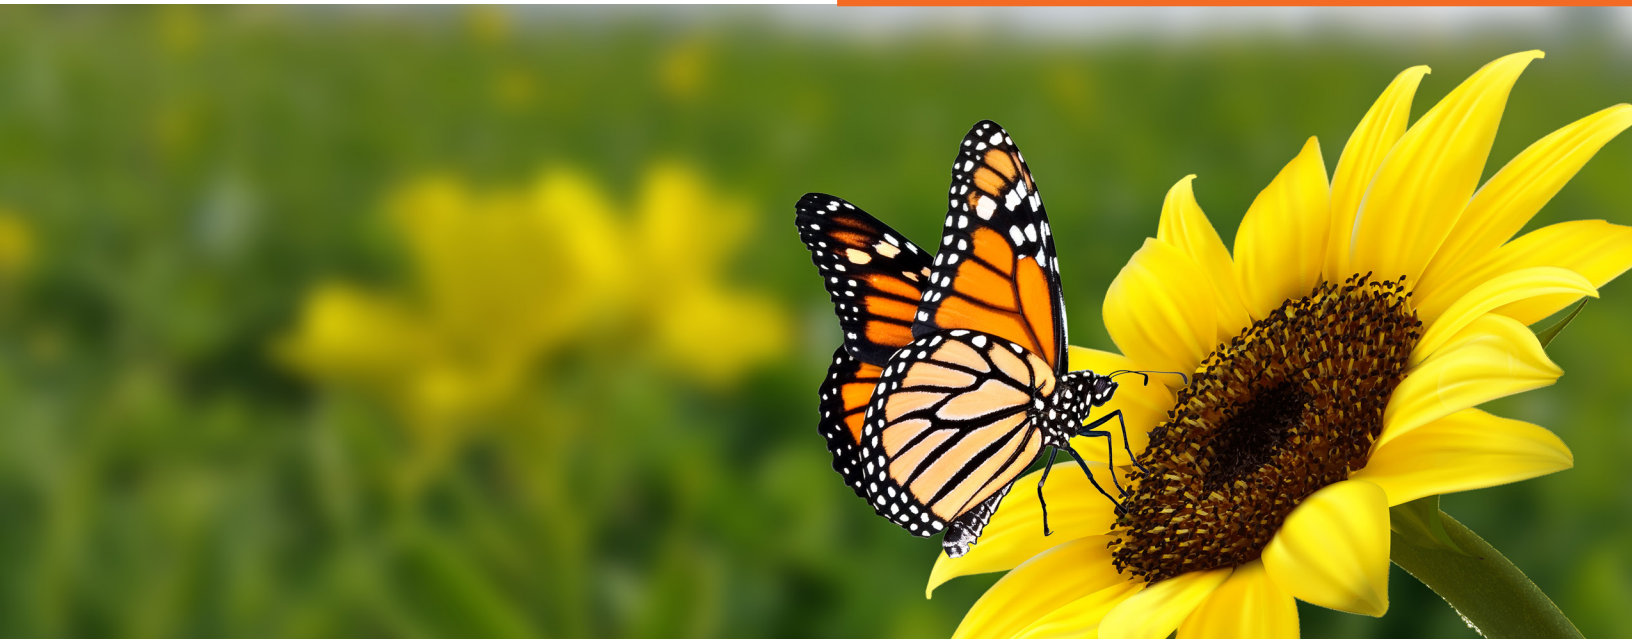

741

additional pollinator
habitat acres submitted
beyond CRP and CP-42
in Illinois.

STAKEHOLDERS WHO SUBMITTED EFFORTS:

FINANCIALS

2014-2019
IFB COMMITTED OVER
\$110,000
TO SUPPORT RESEARCH

Results from this research will be submitted separately to the USFWS to help update their estimates of the number of milkweed stems which grow in different types of agricultural landscapes.
